

CHCS TRAINING

Module 17

EU CLP Classification for Supply - Substances

Tuesday
10th October 2017

Malmaison Hotel,
1-3 Piccadilly,
Manchester, M1 1LZ

Registration 09.00
Start 09.30
Close 16.30

NOTE: Please feel free to print out this brochure and forward copies to personnel of your own or any other company who you feel might appreciate receiving it.

MODULE 17 – EU CLP CLASSIFICATION FOR SUPPLY - SUBSTANCES

Classification is the key procedure upon which hazard communication relies, and is central to producing compliant safety data sheets, labels and other documentation.

This module is designed to give an overview of the EU CLP Regulation and the classification of substances.

What you will learn

The module will include sessions covering the following topics:

- Overview of the CLP Regulation and its relation to GHS
- Key concepts of classification: hazard classes, hazard categories, and relationship with labelling
- Physical hazards: which properties does CLP include, how do you measure them, and what are the classification criteria?
- What are the most important toxicological properties, the current testing recommendations, and how do you use the results for substance classification?
- Ecotoxicological properties, testing strategies, and classification.
- Sources of hazard information, how data are obtained and used
- Notification to the Classification and Labelling Inventory

Exercises will be held throughout the day to assist in the understanding of the concepts introduced.

Delegates should note that this module does not cover classification of mixtures (preparations) or details of labelling, which are the subject of the separate [Module 18](#) (*EU CLP Classification for Supply – Mixtures*) and [Module 19](#) (*EU CLP Labelling for Supply*). Nevertheless, mixture classification relies on sound classifications for the component substances in the mixture, and a good understanding of substance classification is highly desirable when considering the classification of mixtures.

This module addresses the EU CLP Regulation which differs in some aspects to the GHS and other regional implementations of the GHS. Where possible differences to GHS will be highlighted during the training.

Who should attend?

The module is mainly aimed at writers of safety data sheets and regulatory personnel, particularly those who are new to CLP classification. To get the most benefit, delegates should have a basic knowledge of chemistry, toxicology and ecotoxicology, although all key concepts will be explained.

Benefits of attending

The module uses a mixture of teaching and practical exercises to classify substances according to CLP criteria. This classification will be a core requirement for production of compliant safety data sheets and labelling, and an indicator to your customer and regulatory agencies of due diligence. To ensure the most effective training with optimum involvement in participative exercises, there will be a limit of 14 on the number of students.

IOSH members are entitled to include this module in their continuing professional development records.

Module Tutor

Gill Pagliuca has worked in chemical safety for more than 25 years, providing consultancy services including classification and preparation of safety data sheets for a wide range of customers and products.

Comments From Delegates Attending The May 2016 Course

“Good content, supportive + helpful. Plenty of exercises.”

“Covered most of the tox / enviro / reg. Really enjoyed doing the exercises”

“Clear and detailed explanations. Very helpful exercises. Experienced knowledge”

“The exercises were really useful to cement knowledge learnt and keep engaged”

Reserving A Place

You can reserve a place at this course by completing our online Registration Form at: <https://chcs-clg.org.uk/event-2375780>. Courses are only available to CHCS Members. If you are not an existing member and would like to join, again, the process is simple and you can complete our online Membership Registration form at: <https://chcs-clg.org.uk/join-chcs>.

Our training courses are £295 (+VAT). However, we offer a **discounted price** of only £245 (+VAT) which expires 9 weeks before the date of the course. Please see the [online event](#) for more details.

Participants need to bring an electronic copy of the Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures, including Annexes on a laptop or tablet for use during the exercises.

The latest consolidated version of the CLP Regulation can be downloaded from:

<http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02008R1272-20170101&from=EN>

Please note: A calculator will also be needed.

Your attention is drawn to the conditions below:

Delegates can be substituted at any time, subject to payment of membership fee if applicable. **However, once booked, the full fee is payable. As this is a limited space training event refunds can only be made if CHCS is notified in advance, and is able to successfully re-offer the place to another delegate.**

CHCS reserves the right to alter or cancel the programme due to circumstances beyond our control. If CHCS cancels, then refunds will be made.
